STOCK

## Contactless Technology

As people become increasingly conscious and hesitant to touch public surfaces, contactless interaction is among top priorities for people today. Triggered by facial recognition, users can have their temperature read by simply standing within three feet of iDISPLAY Thermometer.

## Thermal Imaging Powered By Omron Sensor

Backed by the world's leading technology in infrared thermopile arrays known as the Omron Sensor, iDISPLAY Thermometer can recognize and capture different levels of infrared light to accurately and rapidly detect temperature.

## Generation 3 Now Released Key Features & Benefits

The newly released Generation 3 iDISPLAY brings a whole range of additional features to the market. Once connected to the Cloud you can remotely control and configure a network of iDisplays and view real time device usage. Know instantly if a high temperature alert is triggered via email / text notifications.

## Rapid Response

A frictionless interaction, iDISPLAY Thermometer enables users to have their temperatures read in a matter of 2 seconds, ensuring a steady and safe flow of traffic into public spaces.

## Online and Analytics Support
